

DIVISION OF MEDICAL SCIENCES SEMINAR SERIES

The Effects of Anthropogenic Stressors on Fish Development

Dr. Joanna Wilson

Department of Biology at McMaster University

Tuesday, February 13, 2018
12:00 p.m. to 1:00 p.m.

Dr. Joanna Wilson is an Associate Professor in the Department of Biology at McMaster University. Dr. Wilson holds a BHSc in Biology and Pharmacology (McMaster) and a MSc in Biology (University of Victoria). She received her PhD from MIT and the Woods Hole Oceanographic Institution in 2003 and joined the faculty at McMaster University in 2006. Dr. Wilson's research focuses on the evolution and function of cytochrome P450 enzymes and the effects of environmental stressors in animals, with an emphasis on aquatic species. She is particularly interested in anthropogenic stressors introduced into the environment from industry and personal use. Her research program intersects environmental physiology, biochemical toxicology, and molecular biology.
